

DESCRIPTION

Jager is the new breed of rugged 4 post hoists

A great backbone to any workshop, the JFS-60 is designed with a laundry list of key features, including extended runways to accommodate a wide variety of vehicle wheelbases, extra safety for your peace-of-mind and quality materials so you can be confident that your hoist is there for the long haul.

Using quality materials and engineered for longevity, this model features heavy duty aircraft cable specifically designed for lifting applications, built in lubrication to help keep critical parts well lubricated to simplify maintenance, and hidden hydraulic cylinder for maximum performance and reliability through minimum exposure to the elements.

These rugged 4 post hoists are newly engineered to accommodate car and trucks, built to last featuring upgrades to safety, durability and productivity. With a generous 6t lifting capacity, this lift can meet the strenuous demands of even your toughest professional lifting jobs.

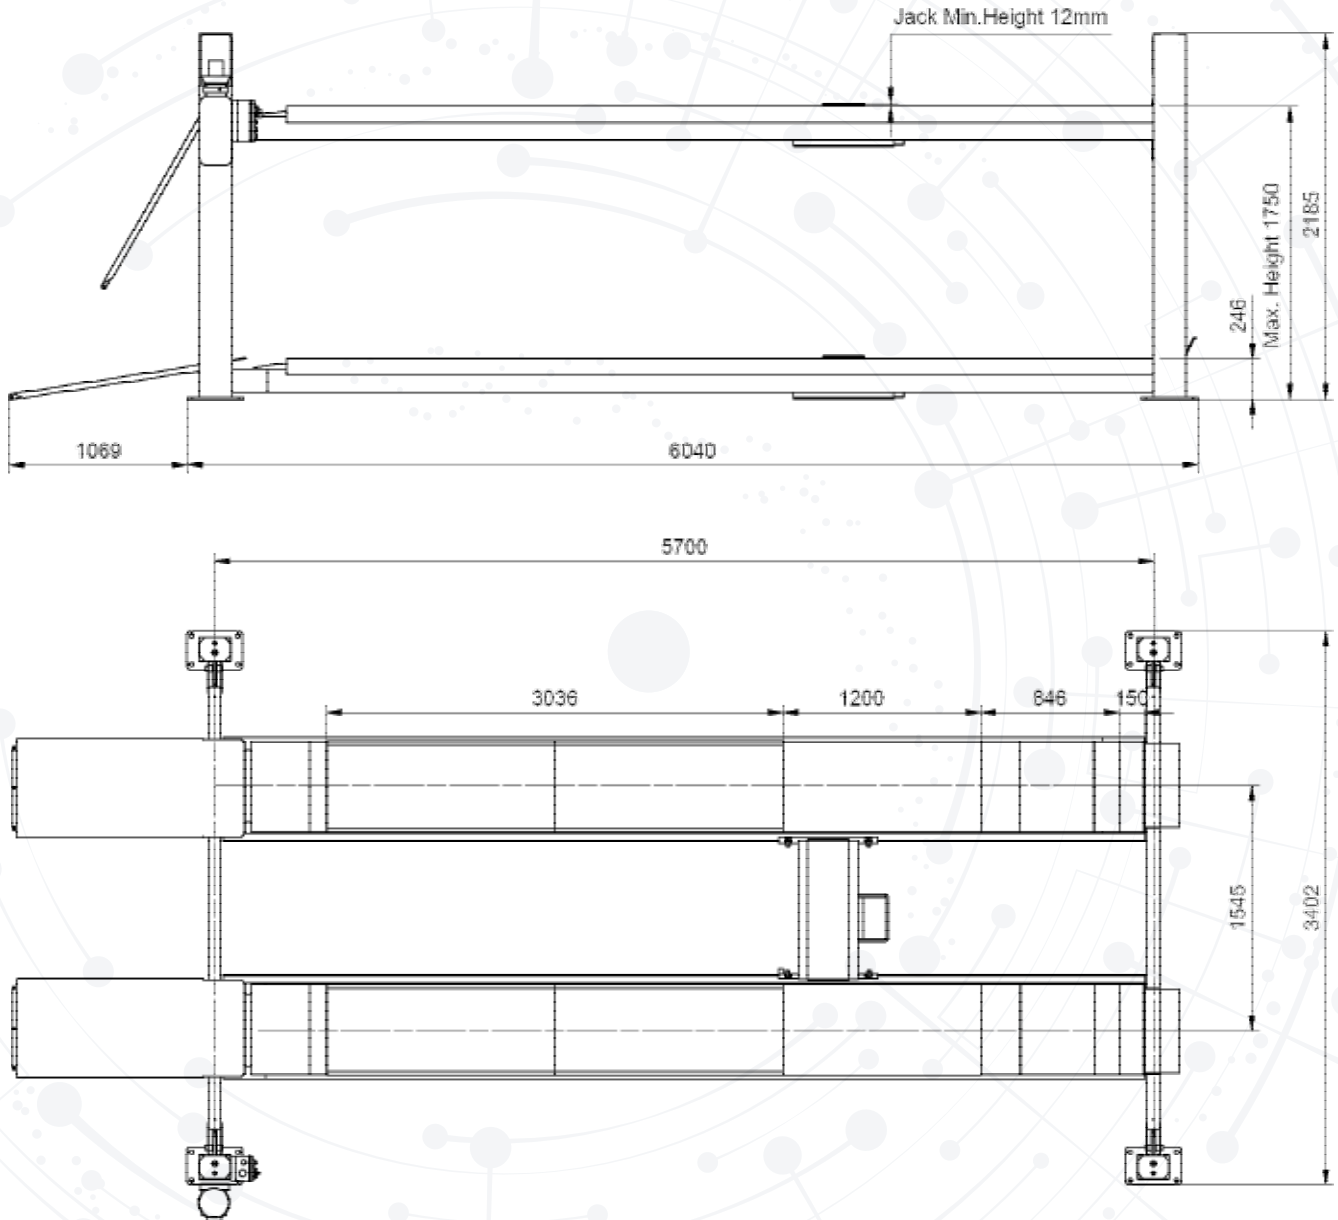

Features

- Integrated eccentric brake system
- Emergency stop switch
- Electrical parking system in height adjustable ratchets
- Hydraulic cylinder under right platform
- Lifting and lowering by means of cables
- Emergency lowering valve
- Built in provision for jacking beam
- 2 Year Warranty
