

DESCRIPTION

Air-operated double diaphragm pump

All our air-operated double diaphragm pumps have simple valves, making them extremely reliable for many applications. All the parts can be substituted without opening those parts of the body that are in contact with the fluid.

- Casting: Aluminium
- Compression Ratio: 1:1
- Max. Flow Rate: 700 l/min
- Fluid Connections: 2" BSP
- Diaphragm: NBR
- Balls: INOX AISI 316
- Gasket: NBR
- Fluids: Oil – Exhausted Oil – Diesel Fuel

Tech Specs	LWS028 A700-AB1
Fluid Connections	2" BSP
Air Connection	¼" BSP
Max. Flow-rate	700 l/min
Max. Air Pressure	8 bar
Max. Delivery Height	80 m
Max. Suction Lift Dry	5.0 m
Max. Suction Lift Wet	9.8 m
Max. Solid Passing	8.5 mm
Noise Level	78 dB
Displacement per Cycle	1,250 cm ³
Mac Viscosity	50,000 cps
Max. Temp	95°c
Weight	36 kg
Measurements (WxLxH)	345 x 595 x 560 mm
