

### DESCRIPTION

#### LWS048-1500-300 Vertical Electro-Hydraulic Oil Filter Crusher

This oil filter crusher compacts the oil filters of every vehicle and achieves a double result: the total recovery of the residual oil and the reduction of the size of the filters.

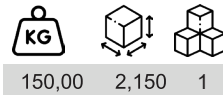

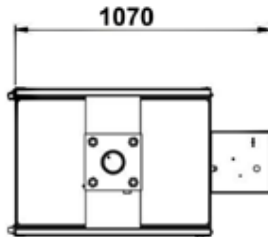

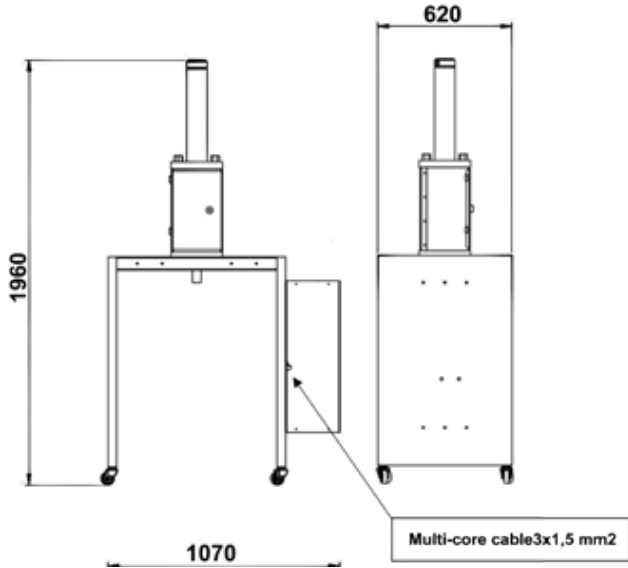

The oil and compressed filters are automatically collected in two different containers. The filters' container is equipped with a basket that, besides collecting the filters, allows the dripping of the possible residual oil.

#### Advantages:

- The reduction of the filters' volume
- Separate recovery of waste oil and filters
- Facilitation of correct waste disposal
- 

The LSW048-1500-300 Vertical Electro-Hydraulic Oil Filter Crusher is equipped with a trolley with 4 orientable wheels.

The pressing device is based on a cylinder with chromed rod having a stroke of 330 mm.

LWS048-1500-300  
The drum is not included

Technical data		LSW048-1500-300
Voltage AC	V/HZ	230/50
Absorption	A	10
Power	W	1500
Piston Power	kg	15000
Maximum filter size	mm	D.130 L.300
Piston stroke	mm	330
Protection rating		IP43
