

DESCRIPTION

Hydraulic Wheel Trolley for Vans, Trucks & Buses

When you're removing large wheels and brake drums, you need a reliable and durable wheel trolley to manoeuvre around the workshop. The WTA-500 is the perfect trolley with a lift capacity of 500kg, your heavy rolling becomes light work.

Flexible and ergonomic, this wheel trolley features roller bearings on the lifter arms for easy rotation of the wheel into the correct position. With safety being paramount in workshops, this trolley has a hand operated dead man's release.

The pedal operated pump leaves the operator with both hands free for working, while the strong bracket secures the load during transport, making this a trolley for more than just wheels, also suitable for brake drums, fuel tanks, tool boxes and more.

Tech Specs	WTA-500
Capacity	500 kg
Height	1180 mm
Length	870 mm
Width	990 mm
Roller / Fork Length	415 / 600 mm
Roller Distance	260 / 710 mm
Lifting Height	717 mm
Wheel Size	Ø 270 - 1300 mm
Weight	100 Kg
